

EASY CARE INSTRUCTIONS

Congratulations on your purchase of a Hardback Spa Cover.

Treated with care, your spa cover will give you many years of faithful service.

PLEASE TAKE TIME TO FOLLOW THESE EASY INSTRUCTIONS

- *Ensure the cover is locked down when the spa is unattended*
- *Leave your cover off for at least one hour after adding chemicals to your spa*
- *Check that all the cover's locks are undone before lifting the cover*
- *Be careful of sharp objects and rough surfaces when removing or storing your cover*
- *Wash your cover regularly with mild soap and rinse well with clean water*
- *A small amount of spray lubricant on the zips sliders from time to time will ensure the zips will operate properly for many years*
- *Do not allow children or pets to walk or jump on the cover*
- *Do not lift or pull your cover by its straps, flaps, skirts or heat seals*
- *Foam core must be turned over at least once every 6 months*
- *To keep your spa cover in top condition apply saddle soap twice per year*

USING YOUR SPA COVER

Positioning and Fixing your Cover

Your spa cover will come with four, six or eight locking buckles, which need to be fastened to your spa's shell, cabinet or surround. Position your cover on the spa with the join or hinges in a direction that makes the cover and handles easy to access and operate.

Cabinet or Surround Fixing - External Locks

Let the straps hang to a natural position and mark around the bottom edge of the buckle. Unclip the buckle, place the bottom half of the buckle up against your fixing & mark the holes. Use a 2.5mm drill bit and drill your holes before placing the screws. If you are drilling into concrete or brick, a masonry drill bit and wall plugs will be required.
